- v) राजा बस चालक है।
- vi) राम कवि है।
- vii) भारतीय मेहनती होते हैं।

7. Answer **any one** of the following :

[4]

Read the passage and answer the questions :

Dolphins are regarded as the friendliest creatures in the sea and stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than people previously imagined. They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the community, as we do. Some scientists have suggested that dolphins have a language but it is much more probable that they communicate with each other without needing words. Could any of these mammals be more intelligent than man? Certainly the most common argument in favor of man's superiority over them that we can kill them more easily than they can kill us is the least satisfactory. On the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

- i.) It is clear from the passage that dolphins ----.

- a) don't want to be with us as much as we want to be with them
 - b) are proven to be less intelligent than once thought
 - c) have a reputation for being friendly to humans
 - d) are the most powerful creatures that live in the oceans
 - e) are capable of learning a language and communicating with humans
- ii.) The fact that the writer of the passage thinks that we can kill dolphins more easily than they can kill us ----.
- a) means that they are better adapted to their environment than we are
 - b) shows that dolphins have a very sophisticated form of communication
 - c) proves that dolphins are not the most intelligent species at sea
 - d) does not mean that we are superior to them
 - e) proves that Dolphins have linguistic skills far beyond what we previously thought
- iii.) Give the opposite of - inferiority, weakest
- iv.) Make sentences with - complex, sailors.

OR

Write a precis' and give a suitable title :

Machines have, in fact, become the slaves of modern life. They do more and more work that human beings do not want to do themselves. Think for a moment of the extent to which machines do work for you. You wake, perhaps, to the hoot of a siren by a machine in a neighboring factory. You wash in water brought to you by the aid of machinery, heated by machinery and placed in basins for your convenience by a machine. You eat your breakfast quickly cooked for you by machinery, go to school in machines made for saving leg labour. And if you are lucky to be in a very modern school, you enjoy

cinema where a machine teaches you or you listen to lessons broadcast by one of the most wonderful machines. So dependent has man become on machines that a certain writer imagines a time when machines will have acquired a will of their own and become the master of men, doomed once more to slavery.
